electric refrigerator; fuller form of 冰箱 (bīngxiāng)

Compare price, appearance & distance

A + 比 (bǐ) + B + adjective compares A with B. 多了 (duō le) and 得多 (de duō) can strengthen a degree; 一点儿 (yìdiǎnr) can soften it. Do not add an extra degree word automatically. 倍 (bèi) describes a multiplicative relation and needs explicit context: the board list is not a rule that every adjective accepts every modifier. Classroom prices are examples, not verified current prices.

比
bǐ
than; comparison marker

汽油
qìyóu
gasoline; petrol

油
yóu

Family & number of people

Use 口 (kǒu) when counting family members. 两个 (liǎng ge) and 三个 (sān ge) count older sisters. The source answer contains an unfilled slot; do not invent a private family history or turn the fragment into a factual personal answer.

家
jiā
home; family, according to context

几
jǐ
how many; asks about a small quantity

Where someone is

在 (zài) + place answers a location question. 哪儿 (nǎr) has a rhotic ending; 哪里 (nǎlǐ) is another form of where. 饭店 (fàndiàn) is restaurant in this classroom contrast, while 酒店 (jiǔdiàn) is hotel; real usage of 饭店 (fàndiàn) can also mean hotel.

在
zài
be at/in; progressive marker before an action

哪儿

饭馆儿
fànguǎnr
restaurant; rhotic form of 饭馆

咖啡店
kāfēidiàn
cafe; coffee shop

酒店
jiǔdiàn
hotel in this classroom contrast

What someone is doing

在 (zài) + action describes an action in progress here. 现在 (xiànzài) can make now explicit. 一直 (yìzhí) stresses continuation; 总是 (zǒngshì) stresses habitual repetition, so they are not universally interchangeable. 干 (gān) has different readings and meanings: gàn (do/work) and gān (dry).

现在
xiànzài
now; at present

他

Source notes - what was not guessed

1. The family answer contains an unfilled slot. Supply a true personal answer yourself; none is invented here.
2. Digits in the date table and 30 were written out as Chinese numerals; repeated date headings were expanded.
3. The unexplained 10.30 / 六 / 24° and 1978-2016 / 2-3 marks are retained in the source file, not converted into historical, policy or calendar facts.
4. Prices are classroom examples. The power-unit notation and unlabeled cost are not silently converted.
5. The short clip contains 70 reviewed video frames and an audio stream. No audio transcript is claimed; local listening remains a final source check.
6. Optional source observations, detailed characters and audio reuse planning are separate. No learning grade or audio completion is fabricated.
