Lesson 07 Comparisons and daily life

28 October 2026 | Hybrid learning pack | English

Learn to compare people and things, say how large a difference is, and use today's vocabulary in real situations. Start with complete words and meaningful sentences; handwriting is optional and comes last.

比	一点儿	多了 / 得多
bǐ	yìdiǎnr	duō le / de duō
than / compared with	a little	much / a lot

One comparison three degrees

高	高一点儿	高得多
gāo	gāo yìdiǎnr	gāo de duō
taller	a little taller	much taller

Your study route

Learn pages 2-12. Try recognition, sentence building, contrast and speaking on pages 13-17. Read without pinyin on page 18. Check pages 19-22, then use the writing grids on pages 23-24.

How to read this pack

"From the board" and "From the screenshot" identify supplied lesson content. "Added practice" identifies teaching examples created for this workbook. Repeated photographs are combined, but every legible new lesson item is retained. Full pinyin and translations are editorially normalized, including on source-labelled lines.

Pinyin convention

Word entries use standard tones; natural 一 / 不 changes appear in phrases: 一点儿 yìdiǎnr, 不要 bú yào. Third-tone sequences keep dictionary marks. Neutral syllables have no accent: de, le, ge, yi in piányi and fu in dàifu. English names remain names.

Build a comparison

A 比 B + adjective | From the board in photos 13-14

Compare the two heights

A = 180 cm B = 175 cm Difference = 5 cm

From the board

A 比 B 高。

A bǐ B gāo.

A is taller than B.

The order carries the meaning

A is the thing you describe. 比 introduces the comparison standard B. The adjective comes after both: A + 比 + B + 高. Chinese does not add an ending like English “-er”. Do not add 是 before 高 in this pattern.

高	比	身高
gāo	bǐ	shēngāo
tall / high	than	body height

Added practice

我比你高。

Wǒ bǐ nǐ gāo.

I am taller than you.

Reverse it carefully

Changing A and B reverses the comparison. B 比 A 高 says B is taller, so it does NOT describe this diagram. To describe B, use the added word 矮 ǎi: B 比 A 矮。B is shorter than A.

A little or much

The size of the difference comes AFTER the adjective

Two different gaps

A 180 cm / B 179 cm

small gap 1 cm

A 185 cm / B 163 cm

large gap 22 cm

From the board · photos 10 and 12

A 比 B 高一点儿。

A bǐ B gāo yìdiǎnr.

A is a little taller than B.

From the board · photo 09

Robert 比我高多了。

Robert bǐ wǒ gāo duō le.

Robert is much taller than me.

From the board · photo 09

Robert 比我高得多。

Robert bǐ wǒ gāo de duō.

Robert is much taller than me.

Three useful endings

Adjective + 一点儿 = a little more. Adjective + 多了 or 得多 = much more. 多了 and 得多 are near-equivalent here; choose ONE, not both. The 得 in 得多 is neutral de, not dé or děi. Here 了 is part of the degree expression, not a past-tense ending.

Read the whole pattern

A 比 B + adjective + 一点儿 / 多了 / 得多. These endings describe a difference; they do not give an exact number. Context decides what counts as “a little” or “much”.

Height weight and units

Measurements from photos 09-13 | Added complete sentence practice

身高 shēngāo body height	体重 tǐzhòng body weight	厘米 límǐ centimetre
米 mǐ metre	公斤 gōngjīn kilogram	八十公斤 bāshí gōngjīn 80 kilograms

Read the classroom numbers

180 cm = 一百八十厘米 yì bǎi bā shí límǐ. 175 cm = 一百七十五厘米 yì bǎi qī shí wǔ límǐ. 179 cm = 一百七十九厘米 yì bǎi qī shí jiǔ límǐ. 185 cm = 一百八十五厘米 yì bǎi bā shí wǔ límǐ. 163 cm = 一百六十三厘米 yì bǎi liù shí sān límǐ.

Added practice

我的身高是一米八。

Wǒ de shēngāo shì yì mǐ bā.

My height is 1.80 metres. 一米八 is a common spoken height form.

Added practice

我的体重是八十公斤。

Wǒ de tǐzhòng shì bāshí gōngjīn.

My weight is 80 kilograms. This is a practice sentence, not a claim about you.

Added practice

A 比 B 高五厘米。

A bǐ B gāo wǔ límǐ.

A is five centimetres taller than B. Put the exact difference after 高.

Adjective versus noun

高 describes height; 身高 names the measurement. 体重 is a noun. Added comparison words: 重 zhòng = heavy; 轻 qīng = light; 矮 ǎi = short in height. For “heavier”, use 比…重, not 比…体重.

Compare phone prices

From photos 04-06 and 08 | Prices are classroom examples

手机	这个手机	那个手机
shǒujī	zhège shǒujī	nàge shǒujī
mobile phone	this phone	that phone

贵	便宜	很便宜
guì	piányi	hěn piányi
expensive	cheap / inexpensive	inexpensive / very cheap

The board at one stage

¥1,800 versus ¥10,000 | photos 06 and 08

From the board

那个手机比这个手机贵多了。

Nàge shǒujī bǐ zhège shǒujī guì duō le.

That phone is much more expensive than this phone.

From the board · photos 04-06

这个手机很便宜。

Zhège shǒujī hěn piányi.

This phone is inexpensive.

Keep the two board stages separate

Photos 04-05 show ¥1,800 and ¥12,000; photos 06 and 08 show ¥1,800 and ¥10,000. Both are preserved as different classroom stages, not treated as an OCR error. In either stage, the second phone is much more expensive.

A useful reverse comparison

Added practice: 这个手机比那个手机便宜多了。Zhège shǒujī bǐ nàge shǒujī piányi duō le. This phone is much cheaper than that one. 便宜 has a neutral final syllable: piányi.

Languages and professions

Source examples express an opinion not an objective ranking

英语 Yīngyǔ English language	汉语 Hànyǔ Chinese language	难 nán difficult
医生 yīshēng doctor	大夫 dàifu doctor	护士 hùshi nurse
重要 zhòngyào important		

From the board · photos 04-05

英语比汉语难多了。
Yīngyǔ bǐ Hànyǔ nán duō le.
English is much harder than Chinese.

From the board · photo 04

医生 / 大夫比护士重要多了！
Yīshēng / dàifu bǐ hùshi zhòngyào duō le!
Doctors are much more important than nurses!

Learn the grammar without adopting the opinion

The first sentence is a speaker’s judgement about difficulty. The second is a classroom value judgement, not a fact endorsed by this workbook. Doctors and nurses have different essential roles. The pattern works grammatically even when its message is debatable.

Choose one synonym in speech

医生 and 大夫 both mean doctor in this context. The slash on the board offers alternatives; you do not say both words together. Here 大夫 is dàifu, not the historical title dàfū.

Compare accurately

Added grammar support for the pattern taught on the board

Do not put 很 into a basic 比 comparison

我比你高。= I am taller than you. Avoid 我比你很高 for this basic meaning. 很 belongs naturally in a simple description: 这个手机很便宜。A simple adjective statement often uses 很 without strongly stressing “very”.

Added practice

这个手机比那个手机便宜一点儿。

Zhège shǒujī bǐ nàge shǒujī piányi yìdiǎnr.

This phone is a little cheaper than that phone.

Two negative patterns have different force

A 没有 B + adjective usually means A is not as ... as B. A 不比 B + adjective denies that A is more ...; it can allow equality. Do not translate both as an automatic claim that A is less.

Added practice

我没有你高。

Wǒ méiyǒu nǐ gāo.

I am not as tall as you. You are taller.

Added practice

我不比你高。

Wǒ bù bǐ nǐ gāo.

I am not taller than you. I may be equally tall or shorter.

Added practice

这个手机比那个手机贵吗?

Zhège shǒujī bǐ nàge shǒujī guì ma?

Is this phone more expensive than that one?

Build then check

Choose A and B. Choose the adjective. Add a small / large / exact difference if needed. For a yes-or-no question, add 吗. Keep only one comparison relationship in each basic sentence.

Parks and place names

Words and phrases from photos 01-03

公园 gōngyuán park	大公园 dà gōngyuán a large park	桂花公园 Guìhuā Gōngyuán Guihua Park
人民公园 Rénmín Gōngyuán People's Park	桂花 guìhuā osmanthus	人民 rénmín the people

Read meaningful pieces together

大 + 公园 = 大公园 — size + place

桂花 + 公园 = 桂花公园 — plant name + place

人民 + 公园 = 人民公园 — people + place

A description versus a name

大公园 describes a large park; the photo alone does not establish it as a particular park's official name. 桂花公园 and 人民公园 are name-like expressions. No city, map location or actual event schedule is inferred from the board.

Added practice

这个公园很大。
Zhège gōngyuán hěn dà.
This park is big.

Added practice

我们去桂花公园吧。
Wǒmen qù Guìhuā Gōngyuán ba.
Let's go to Guihua Park. Added words: 去 qù = go; 吧 ba softens a suggestion.

Pond canteen and food

Sound contrast and word families | From photos 01-02

池塘	食堂	食物
chítáng	shítáng	shíwù
pond	canteen / dining hall	food

Link sound shape and meaning

池塘	食堂	食物
chítáng	shítáng	shíwù
water place	place to eat	what you eat

Listen to the first syllable

池塘 chítáng and 食堂 shítáng both have 2nd + 2nd tones. Their first initials differ: ch is an aspirated retroflex affricate (a brief stop released into friction); sh is a continuous retroflex hushing sound. Do not change 塘 táng into 堂 táng just because they sound the same.

Recognise the 食 family

食 shí is linked to food/eating in 食堂 and 食物. 池塘 names a pond; it is not a dining place. The board explicitly contrasts 池塘 versus 食堂 and glosses 食物 as “food”.

Added practice

公园里有一个池塘。

Gōngyuán lǐ yǒu yí ge chítáng.

There is a pond in the park.

Added practice

我在食堂吃饭。

Wǒ zài shítáng chī fàn.

I eat in the canteen.

Added practice

食堂的食物很便宜。

Shítáng de shíwù hěn piányi.

The food in the canteen is inexpensive.

People dates and routines

Source fragments from photo 01 | Complete sentences are added practice

单身	相亲	每
dānshēn	xiāngqīn	měi
single / not in a relationship	meet a potential partner / blind date	every / each

星期六	上午	十一月十一号
xīngqīliù	shàngwǔ	shíyī yuè shíyī hào
Saturday	morning / before noon	11 November

From the board · phrase, not a complete sentence

每星期六上午

měi xīngqīliù shàngwǔ

every Saturday morning

Build the time phrase from large to small

每 + 星期六 + 上午 = every + Saturday + morning. A time phrase usually goes before the verb, either before or after the subject. The board also shows 11月11号; 月 marks month and 号 marks the day of the month in everyday speech.

Added practice

我每星期六上午去公园。

Wǒ měi xīngqīliù shàngwǔ qù gōngyuán.

I go to the park every Saturday morning.

Added practice

他是单身。

Tā shì dānshēn.

He is single.

Keep the fragments separate

单身, 相亲, 11月11号 and 每星期六上午 appear near one another. This establishes vocabulary, not a verified announcement that matchmaking takes place at a particular park every Saturday or on 11 November.

Order a drink precisely

Cola vocabulary from photos 11 and 14

可乐 kělè cola	无糖可乐 wútáng kělè sugar-free cola	糖 táng sugar
冰 bīng ice	可口可乐 Kěkǒu Kělè Coca-Cola	百事可乐 Bǎishì Kělè Pepsi

From the board · 不要糖 / 冰 expanded into two phrases

不要糖。 / 不要冰。
Bú yào táng. / Bú yào bīng.
No sugar. / No ice.

Sugar-free is not the same as no added sugar

无糖可乐 names sugar-free cola. 不要糖 asks for no sugar to be added to a prepared drink; it cannot remove sugar already in bottled cola. 不要冰 means no ice, not necessarily a warm drink. 不 changes to bú before fourth-tone yào.

Added practice

我要无糖可乐，不要冰。
Wǒ yào wútáng kělè, bú yào bīng.
I'd like sugar-free cola, with no ice.

Added practice

你要可口可乐还是百事可乐?
Nǐ yào Kěkǒu Kělè háishi Bǎishì Kělè?
Would you like Coca-Cola or Pepsi?

A useful choice question

Added practice: 还是 háishi links alternatives in a question. Answer with your choice: 我要百事可乐。 Wǒ yào Bǎishì Kělè. I'd like Pepsi. This is a choice question, not the 比 + adjective comparison pattern.

Engineering work and talent

From the supplied screenshot and the board in photo 15

电
diàn
electricity

电气工程
diànqì gōngchéng
electrical engineering

电气工程师
diànqì gōngchéngshī
electrical engineer

电工
diàngōng
electrician

电子工程
dianzǐ gōngchéng
electronics engineering

天才
tiāncái
genius / exceptional natural talent

Field of study versus occupation

The screenshot translates French génie électrique as electrical engineering: 电气工程. 工程 means engineering; 工程师 means engineer. 电工 is an electrician, a different occupation. 电子工程 is electronics engineering, not the same label as 电气工程.

Added practice

我学电气工程。
Wǒ xué diànqì gōngchéng.
I study electrical engineering.

Added practice

他是电气工程师。
Tā shì diànqì gōngchéngshī.
He is an electrical engineer.

Use 天才 carefully

The board glosses 天才 as “talent”. For a person, “genius” is the clearer translation. Added example: 他是天才。Tā shì tiāncái. He is a genius. 天才 can also refer to exceptional innate ability; it is not the ordinary word for any learned skill.

Practice A recognise the meaning

Match each numbered Chinese item with one letter | No pinyin first

A canteen B much cheaper C electrical engineer
D pond E sugar-free cola F body weight
G every Saturday morning H a little taller

1. Choose a letter.

   池塘

2. Choose a letter.

   食堂

3. Choose a letter.

   体重

4. Choose a letter.

   高一点儿

5. Choose a letter.

   便宜多了

6. Choose a letter.

   每星期六上午

7. Choose a letter.

   无糖可乐

8. Choose a letter.

   电气工程师

Then say the words

After matching, read all eight items aloud. Finally cover the Chinese and retrieve the word from its meaning. Answers are on page 19.

Practice B complete the pattern

Use the word bank once each | Answers on page 19

Word bank: 比 · 一点儿 · 多了 · 厘米 · 公斤 · 食堂 · 冰

1. A is taller than B.

   A ___ B 高。

2. A is 180 cm and B is 179 cm. A is a little taller.

   A 比 B 高 ___。

3. The phones cost ¥10,000 and ¥1,800. That one is much more expensive.

   那个手机比这个手机贵 ___。

4. A height of 180 centimetres.

   身高：一百八十 ___。

5. A weight of 80 kilograms.

   体重：八十 ___。

6. The place where I eat on campus is the canteen.

   我在 ___ 吃饭。

7. I want sugar-free cola with no ice.

   我要无糖可乐，不要 ___。

Check meaning as well as position

Every completed sentence should make sense. After you fill the gaps, read the entire sentence instead of repeating only the missing word.

Practice C rebuild the sentence

Use every chunk once | Add punctuation | Answers on page 20

1. I am taller than you.

   高 / 我 / 你 / 比

2. This phone is a little cheaper than that one.

   便宜 / 那个手机 / 比 / 一点儿 / 这个手机

3. Robert is much taller than me.

   我 / 高 / Robert / 得多 / 比

4. I go to the park every Saturday morning.

   去 / 我 / 公园 / 每星期六上午

5. I want sugar-free cola with no ice.

   不要冰 / 我要 / 无糖可乐

6. He is an electrical engineer.

   电气工程师 / 他 / 是

Practice D choose the right contrast

Choose one option and explain the difference | Answers on page 20

1. A = 180 cm, B = 179 cm. Which degree best fits this small gap?

   A 比 B 高（一点儿 / 多了）。

2. Select the ordinary basic comparison.

   我比你（高 / 很高）。

3. Which means “I am not as tall as you”?

   我（没有 / 不比）你高。

4. Which word means pond rather than canteen?

   池塘 / 食堂

5. Which names a field of study rather than an occupation?

   电气工程 / 电工

6. You want a sugar-free bottled cola. Which request states that clearly?

   无糖可乐 / 不要糖

7. In the doctor synonym 大夫, choose the reading used in this lesson.

   dàifu / dàfū

One more spoken check

Does 高多了 necessarily describe the past? No. Explain why the 了 here does not function as a general past-tense marker.

Practice E speak in real situations

Speak first then write a short version | Model answers on page 21

1. Compare A at 180 cm with B at 175 cm. State the exact difference.

2. Compare the ¥1,800 phone with the ¥10,000 phone. Start with “this phone” and use “much cheaper”.

3. Say your practice character goes to Guihua Park every Saturday morning.

4. Order sugar-free cola with no ice.

5. Say you study electrical engineering. Then say your friend is an electrician. These are fictional practice roles.

6. Say there is a pond in the park. Then name the place where you eat on campus.

Read without pinyin

Added reading practice | Read the Chinese before answering

Reading 1 Two phones

这个手机一千八百元，那个手机一万元。
那个手机比这个手机贵多了。
我想买这个手机。

1 How much does each phone cost?
2 Which is more expensive? Which does the speaker want?

Reading 2 Saturday morning

我每星期六上午去桂花公园。
公园里有一个池塘。
中午，我去食堂吃饭。

3 When and where does the speaker go?
4 What is in the park? Where does the speaker eat at noon?

Reading 3 Study and a drink

我学电气工程。我的朋友是电工。
我们去买可乐。我说：
“我要无糖可乐，不要冰。”

5 What does the speaker study? What is the friend’s job?
6 What exactly is the drink order?

Small reading helper

元 yuán = yuan; 一万 yí wàn = ten thousand; 想 xiǎng = would like / want; 买 mǎi = buy; 中午 zhōngwǔ = noon; 朋友 péngyou = friend. These are added support words, not extra board vocabulary.

Answers A and B

Recognition and gaps | Pages 13-14

A Match the meaning

1 D 池塘 chítáng = pond
2 A 食堂 shítáng = canteen
3 F 体重 tǐzhòng = body weight
4 H 高一点儿 gāo yìdiǎnr = a little taller
5 B 便宜多了 piányi duō le = much cheaper
6 G 每星期六上午 měi xīngqīliù shàngwǔ = every Saturday morning
7 E 无糖可乐 wútáng kělè = sugar-free cola
8 C 电气工程师 diànqì gōngchéngshī = electrical engineer

B Fill the gaps

1 比 bǐ. A 比 B 高。The comparison standard follows 比.
2 一点儿 yìdiǎnr. A 比 B 高一点儿。A small height gap.
3 多了 duō le. 那个手机比这个手机贵多了。A large price gap.
4 厘米 límǐ. 一百八十厘米 = 180 cm.
5 公斤 gōngjīn. 八十公斤 = 80 kg.
6 食堂 shítáng. 我在食堂吃饭。I eat in the canteen.
7 冰 bīng. 我要无糖可乐，不要冰。No ice.

Review the two easiest confusions

池塘 and 食堂 share the second syllable táng but not the first consonant or meaning. 电气工程 is the field; 电气工程师 is the person.

Answers C and D

Word order and contrast | Pages 15-16

C Reordered sentences

1 我比你高。
Wǒ bǐ nǐ gāo.
2 这个手机比那个手机便宜一点儿。
Zhège shǒujī bǐ nàge shǒujī piányi yìdiǎnr.
3 Robert 比我高得多。
Robert bǐ wǒ gāo de duō.
4 我每星期六上午去公园。
Wǒ měi xīngqīliù shàngwǔ qù gōngyuán.
5 我要无糖可乐，不要冰。
Wǒ yào wútáng kělè, bú yào bīng.
6 他是电气工程师。
Tā shì diànqì gōngchéngshī.

D Choose the contrast

1 一点儿: the difference is only 1 cm.
2 高: omit 很 in the ordinary basic 比 comparison.
3 没有: “not as tall as”. 不比 only denies being taller.
4 池塘: pond. 食堂: canteen.
5 电气工程: the field. 电工: electrician.
6 无糖可乐: a sugar-free product. 不要糖: no added sugar.
7 dàifu: the doctor word in this context.

Spoken check

高多了 means much taller. It does not inherently describe a past event. In this degree expression, 多了 intensifies the difference.

Model answers for speaking

Page 17 | Other natural answers may also work

Added practice

A 比 B 高五厘米。

A bǐ B gāo wǔ límǐ.

1 A is five centimetres taller than B.

Added practice

这个手机比那个手机便宜多了。

Zhège shǒujī bǐ nàge shǒujī piányi duō le.

2 This phone is much cheaper than that phone.

Added practice

他每星期六上午去桂花公园。

Tā měi xīngqīliù shàngwǔ qù Guìhuā Gōngyuán.

3 He goes to Guihua Park every Saturday morning.

Added practice

我要无糖可乐，不要冰。

Wǒ yào wútáng kělè, bú yào bīng.

4 I'd like sugar-free cola with no ice.

Added practice

我学电气工程。我的朋友是电工。

Wǒ xué diànqì gōngchéng. Wǒ de péngyou shì diàngōng.

5 I study electrical engineering. My friend is an electrician.

Added practice

公园里有一个池塘。我在食堂吃饭。

Gōngyuán lǐ yǒu yí ge chítáng. Wǒ zài shítáng chī fàn.

6 There is a pond in the park. I eat in the canteen.

Reading answers and source coverage

Page 18 answers | All 15 supplied images checked

Reading 1

1 This phone costs ¥1,800; that phone costs ¥10,000. 2 That phone is much more expensive. The speaker wants to buy this phone, the cheaper one.

Reading 2

3 Every Saturday morning, to Guihua Park. 4 There is a pond in the park. At noon, the speaker goes to the canteen to eat.

Reading 3

5 Electrical engineering; the friend is an electrician. 6 Sugar-free cola, with no ice. The order specifies both the product and the ice preference.

Photograph inventory

01 Full parks / food / social-time board.
02 Close-up: 桂花公园, 池塘, 食堂, 食物.
03 Close-up: 大公园 and 桂花公园.
04 Comparison formula, ¥1,800 / ¥12,000, language and profession examples.
05 Earlier version of 04 without the profession example.
06 Phone comparison at ¥1,800 / ¥10,000; 贵 versus 便宜.
07 Screenshot: electrical engineering and related terms.
08 Close-up of the ¥1,800 / ¥10,000 comparison.
09 185 / 163 cm; Robert examples; 多了 and 得多.
10 180 / 179 cm; 一点儿 plus larger-degree alternatives.
11 可口可乐 and 百事可乐.
12 180 / 179 cm; 身高 and 体重.
13 180 / 175 cm; 身高, 体重 and 80 公斤.
14 180 / 175 cm; 无糖可乐 and 不要糖 / 冰.
15 180 / 175 cm and 天才.

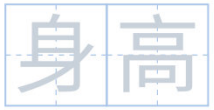

Unclear or incidental material

Erased chalk background cannot be reliably reconstructed. The screenshot's clipped earlier chat fragment appears to contain "腿修了"; it is not clear lesson content and is not taught as correct Chinese. No missing phrase is silently invented. Source wording is preserved; added explanations clarify meaning and usage.

Write meaningful words

Optional | Trace the pale models then write from memory

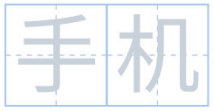

身高 shēngāo body height

体重 tǐzhòng body weight

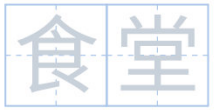

手机 shǒujī mobile phone

公园 gōngyuán park

食堂 shítáng canteen

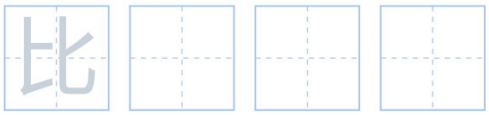

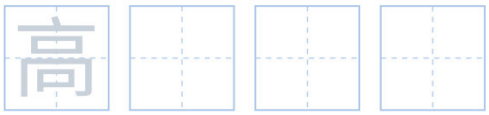

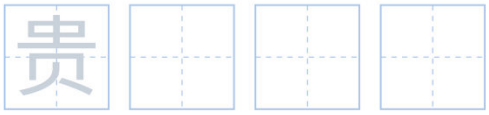

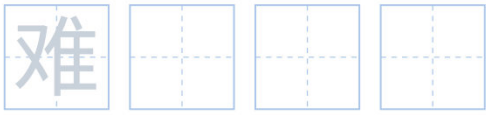

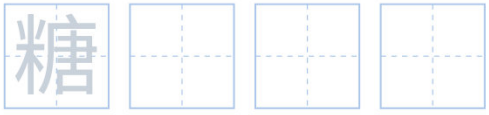

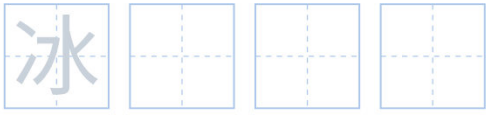

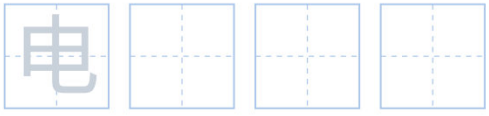

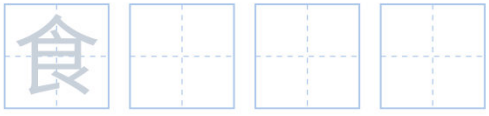

电工 diàngōng electrician

Say the word and meaning before writing. Keep the two characters together as one meaningful unit. Accuracy matters more than filling every box.

Final recall and character practice

Optional | Return from characters to complete expressions

比	bǐ	compare / than	
高	gāo	tall	
贵	guì	expensive	
难	nán	difficult	
糖	táng	sugar	
冰	bīng	ice	
电	diàn	electricity	
食	shí	food / eating in compounds	

One minute exit check

Say one comparison with 一点儿 and one with 得多. Explain 池塘 versus 食堂. Order a sugar-free cola with no ice. Name your field of study without confusing it with a job. If one item is hard, return to its learning page rather than copying it repeatedly.
