Relationships to remember

预习 → 学习 → 复习

yùxí → xuéxí → fùxí

Before → during → after learning. 练习 can happen at each stage.

晴 / 请 / 清

qíng / qǐng / qīng

日 + 青: clear sky. 讠 + 青: request. 氵 + 青: clear water. Compare sounds AND tones.

做饭 → 吃饭 / 开车 ≠ 坐车

zuò fàn → chī fàn / kāi chē ≠ zuò chē

Cook → eat. Drive versus travel as a passenger.

30分钟 = 半小时 / 60分钟 = 一个小时

sān shí fēnzhōng = bàn xiǎoshí / liù shí fēnzhōng = yí ge xiǎoshí

90 minutes = 一个半小时. Duration + 后 puts the result after that interval.

你的家远吗？不远，很近。

Source and edition notes

Verified against all 14 photographs (IMG_0279-0288, 0290-0291, 0293-0294) and 3 existing frames of IMG_0292.mov. This afternoon lesson differs from the morning five-photo lesson. Version 2 expands the existing 28-page Lesson 09 workbook; sources are unchanged.

Board fragments with uncertain context are not invented: the numbers ≤3000 and 900-1000 are not presented as facts about character counts. 2014年 is retained as a year-reading example. Train identifiers K318, T214, D8 and G9001 and 90/60/30-minute durations are classroom comparisons, not timetables. Birthdays, 用 and 都 are not separate photographed topics.

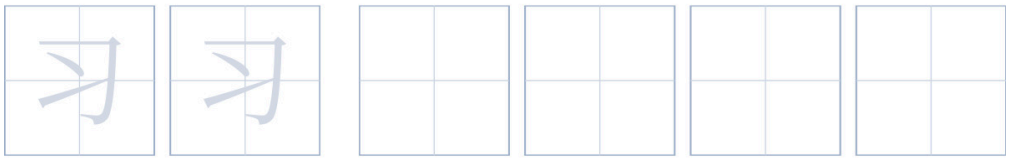

All 96 vocabulary entries and all 61 examples from the editable lesson are included. Added teaching examples are marked. Board questions are normalised: 今天星期几？ has no 吗. Pinyin shows the spoken change of 不 before a fourth tone, as in 不会 bú huì. Normal third-tone sandhi is not respelled. The 24-hour table is an added reference requested in the conversation.

Practice order: read → cover pinyin → answer → check → trace → write from memory. The final pages isolate individual characters, after complete words and sentences. White paper, pale blue grids, light grey models. Delivery pages are opaque RGB at 230 dpi; editable vector PDFs and source are retained.
